

Application No. 10/563,818
Reply to Office Action mailed March 11, 2009

IN THE SPECIFICATION

Please amend [0038] on page 13 of the specification as follows:

As used herein, the genomic sequence of the human IRS-2 gene is included in the sequence reported by Mohammadi, M. at Sanger Center (GenBank accession No: AL162497, version 20), which has a full length of 143,409 bp.
